

Says

What have we heard them say? What can we imagine them saying?

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

Need of more government policies to support the crop production.

Need to meet the demands of the growing population with rising income.

Inadequate irrigation facilities and insufficient water.

Need to meet the demands of the growing population with rising income.

Impact of climate driven changes in the production.

It is important to remove weeds, from the fields, so that the field is fertile and then loosening the soil to cultivate.

Utilization of labours and equipment in less wages or cost

Thinks

India's Agricultural Crop Production Analysis(1997-2021)

Preparation of soil, sowing, adding manure irrigation and harvesting.

Stress due to uncertainities in result. Satisfied when the climatic condition supports.

Development of agricultural inputs that enables higher yields.

Diversify the crops in response to market demand.

Satisfied when the climatic condition supports.

Pleasurable when there is a profit in the production of crops.
